A four-day, five-night adventure, taking in the best that the majestic Rockies and the arid Western Slope of Colorado have to offer. Blistering competition alongside unprecedented roads and diverse scenery mix to create the perfect rally.

Each day presents an evolution in scenery and temperature, alongside great competition, with several outstanding regularities and tests at private race circuits designed to challenge driver and navigator alike.

The route takes us across the southern Rocky Mountains via the incredible vistas of the San Luis Valley, before a night halt in Pagosa Springs, home of the world's deepest geothermal hot spring. The next day takes us north on rugged gravel roads across the Uncompahgre Plateau, through the towering desert sandstones of Colorado's Western Slope. An overnight rest halt at the luxurious Gateway Canyons Resort & Spa will be a welcome respite for weary crews.

The third and fourth days of the rally press eastward where rugged desert vistas and stunning mesas fade into the rearview mirror. High passes offer views of aspens beginning to change their fall colors. Onward we head to stops at local wineries and intimate small towns. A final run south along the front range offers big-sky views, fast gravel, and speed tests in the shadows of 14,000-foot snow-capped peaks.

Join us and experience the best rallying in North America, and the best of the Colorado Rockies.

We can't wait to welcome you!
